

# JAMEC PEM

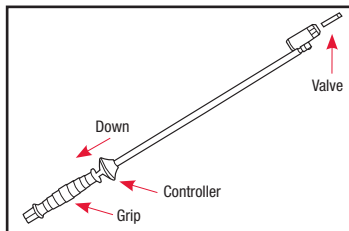

## INSTRUCTIONS FOR USE

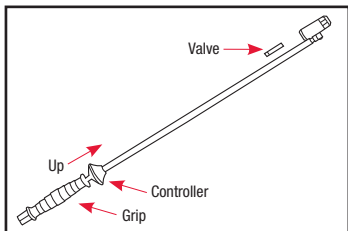

1. This is a single handed dual clip-on air chuck.

2. Push the chuck head onto the tyre valve. Ensure that there are no air leaks.

3. To release use two fingers to pull the controller toward the hand grip. This is a very small movement and will allow you to remove the chuck from the valve.

4. To release push down the controller away from the hand grip. This is a very small movement and will allow you to remove the reverse chuck from the valve.
